LINDA GIORGI

Senior Frontend Engineer & Frontend Architect

Senior Frontend Engineer and Frontend Architect with 14+ years building large-scale e-commerce applications. At Rebike Mobility I consolidated three codebases into an Nx frontend monorepo, set the ADR and module-boundary conventions, and built framework-free Shopify storefronts for five markets. Before that, 10 years at Zooplus, where I led the React migration and owned the product detail page serving 7M+ customers. I bring a designer's eye for how interfaces look and feel, not just how they are built. Fluent in Italian, English and German.

Experiences

SENIOR FRONTEND ENGINEER
Rebike Mobility GmbH, Munich

2024 – 2026

- Architected the consolidation of three fragmented codebases into a two-repo setup with a multi-app Nx frontend monorepo, then ported the legacy ERP refurbishment workflow into a new React app shipped incrementally behind feature flags — for a ~65-person e-mobility scale-up ($57M+ raised).
- Built the Rebike Shopify storefront on a framework-free Web Components architecture across 5 markets (DE/AT/CH/FR/NL), optimizing Core Web Vitals with View Transitions and lazy loading.
- Established Agile/Scrum practices, a new Git flow with trunk-based branching and Conventional Commits, and a Vitest + Storybook quality foundation across a team of 4 developers.

SENIOR FRONTEND ENGINEER & SCRUM MASTER
Zooplus SE, Munich

2021 – 2024

- Owned the product detail page in Next.js and React at Europe's largest online pet retailer (€2.6B revenue, 30 countries): component architecture, Storybook, end-to-end tests with Playwright.
- Acted as Scrum Master for a cross-functional team, ensuring delivery velocity and alignment with business stakeholders.
- Returned from maternity leave to a project behind schedule, covered both frontend and backend gaps, and shipped on the original date.

FRONTEND ENGINEER & FRONTEND TEAM LEAD
Zooplus AG, Munich

Maternity leave: 2019-2021

2017 – 2019

- Led the migration of Zooplus websites to React — serving 7M+ active customers across 30 countries — setting up project architecture and coordinating 3 developers across departments.
- Drove the first fully responsive redesign of the Zooplus site, managing communication between frontend developers and designers across multiple locations.
- Hosted workshops and technical presentations for both developers and business stakeholders.

FRONTEND WEB ENGINEER
Zooplus AG, Munich

Maternity leave: 2015-2016

2014 – 2017

- Contributed to the Zooplus and Bitiba e-commerce platforms, tackling multilanguage solutions and third-party tool integrations.
- Built the business case for responsive design, won management approval, and shipped the first responsive version of the site.

FRONTEND WEB ENGINEER & CONSULTANT
Intranet Standard GmbH, Munich @ Siemens AG

2009 – 2014

- Consultant embedded at Siemens AG for five years, delivering intranet frontends under enterprise security and process constraints.
- Delivered frontend work across enterprise intranet projects, working across Ruby on Rails, ExtJS, and PL/SQL stacks.

Architecture

- Monorepo design (Nx)
- Layered / modular architecture
- REST & API contract design (OpenAPI)
- Design decisions (ADRs)
- CI/CD & release strategy
- Refactoring at scale

LIST OF PROJECTS

Rebike Mobility GmbH, Munich [2024 - 2026]

Refactor applications for the ERP team

May 2026
December 2026

Senior frontend engineer - [ERP team]

Rebike Mobility GmbH, Munich

- Architected the consolidation of three fragmented codebases (modern backend, React frontend, and a legacy full-stack ERP) into a two-repo setup with a multi-app Nx frontend monorepo, authoring ADRs and a phased, zero-downtime migration plan.
- Designed a layered, contract-driven frontend architecture with shared libraries and per-service Orval-generated type-safe API clients, enforced by one-way Nx module boundaries to eliminate contract drift.
- Ported the legacy ERP refurbishment workflow into a new workshop-web app — station picker, worklist, bike detail with tabbed views, todo and spare-part write actions, phase transitions and station moves — shipped incrementally behind feature flags, with an ERP-parity dark theme, 8 locales including RTL, MSW mock mode and co-located Vitest specs.
- Specified the BFF API contracts the port depended on and handed them to the backend team; wrote the manual QA checklist and ran the test passes against the legacy ERP.
- Defined the delivery model — nx affected per-app CI/CD, trunk-based branching, Conventional Commits, and automated per-app releases — alongside a Vitest and Storybook quality foundation, with end-to-end coverage designed in an ADR.

Stack: React · Vite · Nx · TypeScript · TanStack Query · TanStack Router · Orval · Zod · react-hook-form · Tailwind · shadcn/ui · react-i18next · Vitest · MSW · Storybook · Keycloak / OIDC · Docker · nginx · pnpm · Release Please · Conventional Commits · Git

Develop new features for Shopify shop

March 2025
October 2026

Senior frontend engineer - [Shop team]

Rebike Mobility GmbH, Munich

- Architected and refactored the Rebike storefront on Shopify's Horizon theme, adopting a framework-free Web Components architecture for faster loads and zero bundler overhead.
- Built a multi-market, multi-locale system (DE/AT/CH/FR/NL) with market-specific templates and localized emails from a single codebase.
- Optimized Core Web Vitals using modern browser APIs (View Transitions, lazy loading) and integrated third-party tooling (Neocom, SmartFit, GTM/Klar).

Stack: Shopify · Liquid · Horizon Theme · Vanilla JS · Web Components · CSS · Import Maps · View Transitions API · Shopify CLI · ESLint · Prettier · Git

Refactor React website

September 2024
March 2025

Senior frontend React engineer & Scrum master - [Shop team]

Rebike Mobility GmbH, Munich

- Conducted in-depth analysis of the current codebase, evaluating performance and adherence to clean code principles.
- Authored and prioritized technical stories to address identified improvements, aligning with team and organizational goals.
- Provided mentorship to a junior team member, fostering their professional growth and technical skills.

Stack: React · Next.js · ESLint · TypeScript · Git · BitBucket · Jira · Jenkins · Monorepo · npm · Playwright · react-i18next · MaterialUI · Styled-Component · Prettier · Scrum

Zooplus AG/SE, Munich [2014 - 2024]

PDP on React

Frontend React engineer & Scrum master

Zooplus SE, Munich

2021
2024

- Owned the product detail page (PDP) in Next.js + React, responsible for component creation, Storybook documentation, and end-to-end testing.
- Acted as Scrum Master, maintaining team morale and delivery cadence.
- Returned from maternity leave to a team in flux, quickly assessed the situation, and stepped into both frontend and backend roles to get the project back on track — shipped on schedule.

Stack: React · Next.js · ESLint · TypeScript · Git · Storybook · BitBucket · Jira · Jenkins · BFF · Monorepo · pnpm · Jest · Playwright · react-i18next · CSS modules · Prettier · Scrum / Scrumban · CI/CD pipeline · Optimizely · Adobe tools

Moving to React

Frontend web & React engineer + Lead of frontend team

Zooplus AG, Munich

2019

- Led the transition of Zooplus websites to React, implementing components and APIs for enhanced user experiences.
- Set up the project architecture and created cutting-edge components based on graphic designs.
- Led a team of 3 frontend developers across departments, hosting workshops and presentations for developers and business stakeholders.

Stack: JavaScript · HTML · CSS · APIs · AJAX · jQuery · Gulp · Sass · Responsive design · Git · BitBucket · Jira · Jenkins · Java · Scrum / Scrumban · React · Next.js · Npm · ESLint · Yarn · Storybook · CI/CD pipeline

Full Responsive

Frontend web engineer

Zooplus AG, Munich

2017
2018

- Designed and implemented a fully responsive solution for the Zooplus website, catering to all devices from mobile to desktop.
- Managed scalability by developing solutions that could accommodate future company changes.
- Facilitated communication between frontend developers and graphic designers across different locations to ensure consistent styling.

Stack: Scrum · JavaScript · HTML · CSS · PL/SQL · Ajax · jQuery · UnderscoreJS · RequireJS · Gulp · Sass · Responsive design · Git · Java

FELT

Frontend web engineer

Zooplus AG, Munich

2015

- Identified that Zooplus had no responsive strategy, built the business case, convinced management, and then delivered the first partial responsive site — which later became the foundation for the full responsive redesign.
- Developed all frontend code for the project.

Stack: Scrum · JavaScript · HTML · CSS · PL/SQL · Ajax · jQuery · UnderscoreJS · RequireJS · Bootstrap · Gulp · Sass · Responsive design · SVN · Java

Zooplus & Bitiba

Frontend web engineer

Zooplus AG, Munich

2014

- Contributed to Zooplus and Bitiba websites, overcoming challenges related to multilanguage solutions and integration of external tools.
- Collaborated with the team to continuously improve the codebase.

Stack: Scrum · JavaScript · HTML · CSS · PL/SQL · Ajax · jQuery · SVN · Java
