

# LINDA GIORGI

*Senior Frontend Developer*

Senior Frontend Developer with 14+ years building large-scale e-commerce applications — most recently architecting an Nx frontend monorepo and framework-free Shopify storefronts at Rebike Mobility, and before that leading the React migration at Zooplus across a 10-year tenure. I bring both technical depth and a designer's eye: I'm a maker who paints, does origami, and hand-paints shoes, which means I actually care how interfaces look and feel — not just how they're built. Fluent in Italian, English, and German.

## Experiences

**2024 – Today**

### SENIOR FRONTEND DEVELOPER
**Rebike Mobility GmbH, Munich**

- Architected the consolidation of three fragmented codebases into a two-repo setup with a multi-app Nx frontend monorepo, then ported the legacy ERP refurbishment workflow into a new React app shipped incrementally behind feature flags — for a ~65-person e-mobility scale-up ($57M+ raised).
- Built the Rebike Shopify storefront on a framework-free Web Components architecture across 5 markets (DE/AT/CH/FR/NL), optimizing Core Web Vitals with View Transitions and lazy loading.
- Established Agile/Scrum practices, a new Git flow with trunk-based branching and Conventional Commits, and a Vitest + Storybook quality foundation across a team of 4 developers.

**2021 – 2024**

### SENIOR FRONTEND DEVELOPER & SCRUM MASTER
**Zooplus SE, Munich**

- Led development of the product detail page (PDP) in Next.js + React at Europe's largest online pet retailer (€2.6B revenue, 30 countries), owning component architecture, Storybook documentation, and end-to-end testing with Playwright.
- Acted as Scrum Master for a cross-functional team, ensuring delivery velocity and alignment with business stakeholders.
- Returned from maternity leave to a team in flux, quickly assessed the situation, and stepped into both frontend and backend roles to get the project back on track — shipped on schedule.

**2017 – 2019**

### FRONTEND DEVELOPER & FRONTEND TEAM LEAD
**Zooplus AG, Munich**

*Maternity leave: 2019-2021*

- Led the migration of Zooplus websites to React — serving 7M+ active customers across 30 countries — setting up project architecture and coordinating 3 developers across departments.
- Drove the first fully responsive redesign of the Zooplus site, managing communication between frontend developers and designers across multiple locations.
- Hosted workshops and technical presentations for both developers and business stakeholders.

**2014 – 2017**

### FRONTEND WEB DEVELOPER
**Zooplus AG, Munich**

*Maternity leave: 2015-2016*

- Contributed to the Zooplus and Bitiba e-commerce platforms, tackling multilanguage solutions and third-party tool integrations.
- Identified that Zooplus had no responsive strategy, built the business case, convinced management, and then delivered the first partial responsive site — which later became the foundation for the full responsive redesign.

**2009 – 2014**

### FRONTEND WEB DEVELOPER & CONSULTANT
**Intranet Standard GmbH, Munich @ Siemens AG**

- Thrived as a consultant embedded at Siemens AG — adapting to enterprise constraints while finding creative solutions within them.
- Delivered frontend work across enterprise intranet projects, working across Ruby on Rails, ExtJS, and PL/SQL stacks.

## Languages

- Italian
- English
- German
- French

## Hobbies

- Watercolor painting
- Origami & paper art
- Wearable art (painted shoes)
- Reading

## Tools

- Nx
- Playwright
- Storybook
- ESLint
- Prettier
- Docker
- CI/CD
- Jira
- BitBucket
- Git
- (p)npm
- Responsive design
- Scrum & Kanban

## Hard skills

- HTML
- CSS
- Javascript
- Typescript
- SQL & PL/SQL
- Java
- NodeJS
- Liquid
- Shopify

## Frameworks & libraries

- React
- Next.js
- Tailwind CSS
- Sass & SCSS
- TanStack Query
- TanStack Router
- Zod & RHF

## Web platform

- Web Components
- ES Modules
- Web Performance
- Accessibility

## Soft skills

- Tech leadership
- Mentoring
- Communication
- Collaboration
- Independence
- Problem solving
- Creativity

## Architecture

- Monorepo design (Nx)
- Layered / modular architecture
- REST & API contract design (OpenAPI)
- Design decisions (ADRs)
- CI/CD & release strategy
- Refactoring at scale

# LIST OF PROJECTS

## *Rebike Mobility GmbH, Munich [2024 - Today]*

May 2026
Today

### *Refactor applications for the ERP team*

**Senior frontend developer - [ERP team]**

**Rebike Mobility GmbH, Munich**

- Architected the consolidation of three fragmented codebases (modern backend, React frontend, and a legacy full-stack ERP) into a two-repo setup with a multi-app Nx frontend monorepo, authoring ADRs and a phased, zero-downtime migration plan.
- Designed a layered, contract-driven frontend architecture with shared libraries and per-service Orval-generated type-safe API clients, enforced by one-way Nx module boundaries to eliminate contract drift.
- Ported the legacy ERP refurbishment workflow into a new workshop-web app — station picker, worklist, bike detail with tabbed views, todo and spare-part write actions, phase transitions and station moves — shipped incrementally behind feature flags, with an ERP-parity dark theme, 8 locales including RTL, MSW mock mode and co-located Vitest specs.
- Specified the BFF API contracts the port depended on and handed them to the backend team; wrote the manual QA checklist and ran the test passes against the legacy ERP.
- Defined the delivery model — nx affected per-app CI/CD, trunk-based branching, Conventional Commits, and automated per-app releases — alongside a Vitest and Storybook quality foundation, with end-to-end coverage designed in an ADR.

*React (19) // Vite (7) // Nx (22) // TypeScript (5.9) // TanStack Query // TanStack Router // Orval // Zod (4) // react-hook-form // Tailwind (3) // shadcn/ui // react-i18next // Vitest // MSW // Storybook // Keycloak / OIDC // Docker // nginx // pnpm // Release Please // Conventional Commits // Git*

### *Develop new features for Shopify shop*

**Senior frontend developer - [Shop team]**

**Rebike Mobility GmbH, Munich**

- Architected and refactored the Rebike storefront on Shopify's Horizon theme, adopting a framework-free Web Components architecture for faster loads and zero bundler overhead.
- Built a multi-market, multi-locale system (DE/AT/CH/FR/NL) with market-specific templates and localized emails from a single codebase.
- Optimized Core Web Vitals using modern browser APIs (View Transitions, lazy loading) and integrated third-party tooling (Neocom, SmartFit, GTM/Klar).

*Shopify // Liquid // Horizon Theme // Vanilla JS (ES Modules) // Web Components // CSS // Import Maps // View Transitions API // Shopify CLI // ESLint // Prettier // Git*

September 2024
March 2025

### *Refactor React website*

**Senior frontend react developer & Scrum master - [Shop team]**

**Rebike Mobility GmbH, Munich**

- Conducted in-depth analysis of the current codebase, evaluating performance and adherence to clean code principles.
- Authored and prioritized technical stories to address identified improvements, aligning with team and organizational goals.
- Provided mentorship to a junior team member, fostering their professional growth and technical skills.

*React (18) // NextJS (12) // ESLint // Typescript // Git // BitBucket // Jira // Jenkins // Monorepo // npm // Playwright // react-i18next // MaterialUI // Styled-Component // Prettier // Scrum*

## *Zooplus AG/SE, Munich [2014 - 2024]*

2021
2024

### *PDP on React*

**Frontend react developer & Scrum master**

**Zooplus SE, Munich**

- Owned the product detail page (PDP) in Next.js + React, responsible for component creation, Storybook documentation, and end-to-end testing.
- Acted as Scrum Master, maintaining team morale and delivery cadence.
- Returned from maternity leave to a team in flux, quickly assessed the situation, and stepped into both frontend and backend roles to get the project back on track — shipped on schedule.

*React (18) // NextJS (12) // ESLint // Typescript // Git // Storybook // BitBucket // Jira // Jenkins // BFF // Monorepo // pnpm // Jest // Playwright // react-i18next // CSS modules // Prettier // Scrum / Scrumban // CI/CD pipeline // Optimizely // Adobe tools*

2019

### *Moving to React*

**Frontend web & react developer + Lead of frontend team**

**Zooplus AG, Munich**

- Led the transition of Zooplus websites to React, implementing components and APIs for enhanced user experiences.
- Set up the project architecture and created cutting-edge components based on graphic designs.
- Led a team of 3 frontend developers across departments, hosting workshops and presentations for developers and business stakeholders.

*Javascript // HTML (5) // CSS (3) // APIS // AJAX // jQuery // Gulp // Sass // Responsive design // Git // BitBucket // Jira // Jenkins // Java // Scrum / Scrumban // React (16) // NextJS (9) // Npm // ESLint // Yarn // Storybook // CI/CD pipeline*

2017
2018

### *Full Responsive*

**Frontend web developer**

**Zooplus AG, Munich**

- Designed and implemented a fully responsive solution for the Zooplus website, catering to all devices from mobile to desktop.
- Managed scalability by developing solutions that could accommodate future company changes.
- Facilitated communication between frontend developers and graphic designers across different locations to ensure consistent styling.

*Scrum // Javascript // HTML (5) // CSS (3) // PL/SQL // Ajax // jQuery // UnderscoreJS // RequireJS // Gulp // Sass // Responsive design // Git // Java*

2015

### *FELT*

**Frontend web developer**

**Zooplus AG, Munich**

- Identified that Zooplus had no responsive strategy, built the business case, convinced management, and then delivered the first partial responsive site — which later became the foundation for the full responsive redesign.
- Developed all frontend code for the project.

*Scrum // Javascript // HTML (5) // CSS (3) // PL/SQL // Ajax // jQuery // UnderscoreJS // RequireJS // Bootstrap // Gulp // Sass // Responsive design // Svn // Java*

2014

### *Zooplus & Bitiba*

**Frontend web developer**

**Zooplus AG, Munich**

- Contributed to Zooplus and Bitiba websites, overcoming challenges related to multilanguage solutions and integration of external tools.
- Collaborated with the team to continuously improve the codebase.

*Scrum // Javascript // HTML (5) // CSS (3) // PL/SQL // Ajax // jQuery // Svn // Java*
